Turnkey solutions...

No other door distributor, installer or service center offers the breadth of products and services as Dash Door. We pride ourselves on being the definitive resource for integrated high performance door and hardware solutions.

Adrienne Arsht Center

Serving South Florida for over 50 years

The early days of Dash Door were spent pioneering custom automatic door technology solutions for the burgeoning deco hotel and destination market of Miami Beach. Today Dash Door is the largest automatic door supplier and manual door service center in South Florida.

A FEW OF OUR CLIENTS

- Miami Dade Aviation Department • Miami Dade County • American Airlines
- Adrienne Arsht Center • JP Morgan Chase • VA Hospital • Carnival Cruise Lines
- Jones Lang LaSalle • CB Richard Ellis • Walt Disney World Resort • Citi Bank
- Turner Construction Company • University of Miami • Florida Power & Light

THE DASH DOOR DIFFERENCE “The Dash Door Difference” is the combination of experience, product and service offerings, and an ongoing commitment to exceed customer expectations. Our six specialty departments offer our clients a unique turnkey solution to commercial doors and glazing systems.

Did you know...Dash Door has designed, tested and received hurricane product approval for the ONLY center-hung inswing automatic door with a Miami-Dade Notice of Acceptance?

24 / 7 REPAIR SERVICE The Dash Door Service & Maintenance Group provides comprehensive repair and preventative maintenance services for a full range of door types and manufacturers.

No answering machines here – a dispatch operator is ready to take your emergency service call at ANY time. Our AAADM certified technicians are dispatched via our computerized work order and GPS fleet routing system in a vehicle that is stocked with the most commonly required parts for faster turn-around times.

IN-HOUSE ENGINEERING Our in-house professional structural engineering services are available to provide permit drawings as required to incorporate our products into any structural support configuration you may require.

Dash Door can design custom storefront configurations with one-time product approvals, transom window support structure around your hurricane impact automatic entrance or simply aid you in communicating with building officials. Whatever the design challenge may be, our in-house professional engineering is another way Dash Door brings value added service to your project.

ACCESS CONTROL Dash Door’s Access Control Group provides electrified hardware integration and software which is the alternative to the old lock and key. These systems monitor and report door activity and permit easy changes to user access through use of a PC connected to the access control network. Systems employing card technology, electronic release hardware and biometric readers are designed and installed to provide peace of mind, flexibility and control.

INSTALLATION Dedicated installation teams within each Dash Door service group are factory trained for the product lines we distribute. In-house technical support is available to our installation crews via our access control & electronics department. We provide installation services on projects throughout South Florida.

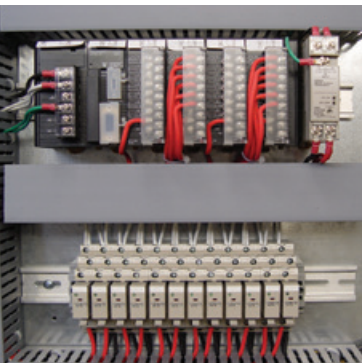

HARDWARE SOLUTIONS Dash Door is an authorized distribution center for major commercial door hardware product lines. Our knowledgeable contract hardware estimators and project managers bring you competitive pricing coupled with product and construction experience. We provide complete and accurate contract door and hardware packages with installation to general contractors and end-users.

AUTOMATIC DOORS The Automatic Door Group provides sales, installation, and support of our partner automatic door manufacturer lines. Unlike many distributors, all members of our knowledgeable sales staff are also technically adept project managers who are a single point of contact throughout your project.

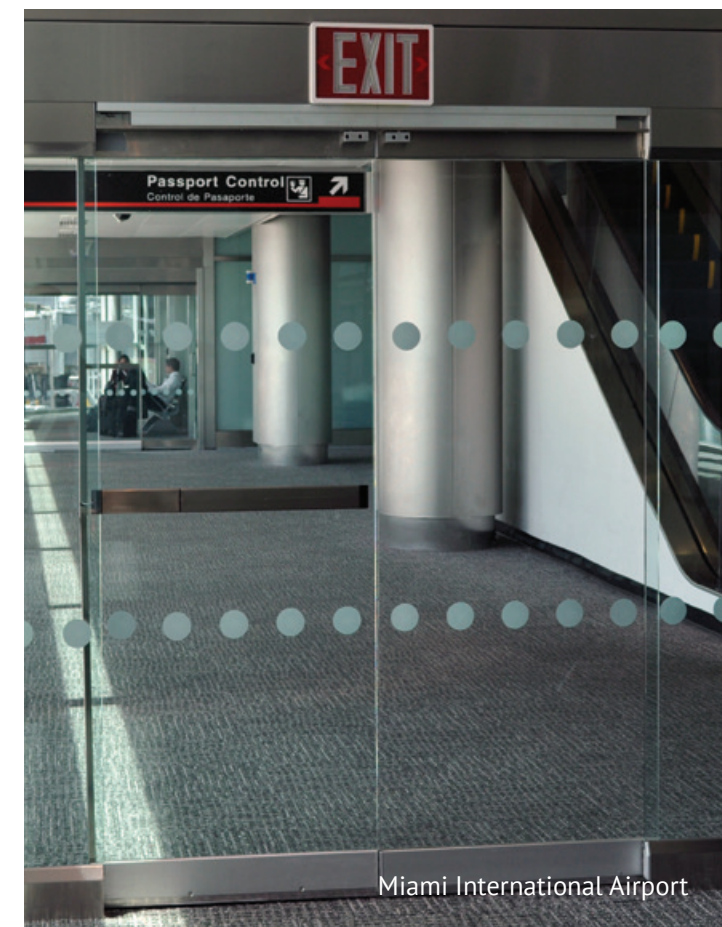

ADA / HANDICAP ACCESS SOLUTIONS Dash Door offers low-energy ADA handicap access operators and retrofit kits to meet ADA requirements. Dash Door’s experience with site specific considerations including automatic operators and activation hardware assure a solution which is both compliant and cost-effective.

INTERIOR GLAZING PACKAGES Dash Door is the “clear choice” for attractive all-glass sliding doors, telescoping sliding walls, heavy glass swing doors and fixed glass partitions for interior tenant fit-outs. Dash Door is a state certified and licensed glass and glazing contractor with the experience to deliver on your next interior glazing package.

GLASS STOREFRONT / DOOR PACKAGES Dash Door installs aluminum and glass storefront and door packages to satisfy both hurricane impact and non-impact requirements. We represent both local and national manufacturers of standard storefront applications as well as specialty products including ballistic, blast resistant and fire-rated glazing solutions.

Custom access control for automatic doors
