AMERICAN LEAK DETECTION

THE ORIGINAL LEAK SPECIALISTS™

www.AmericanLeakDetection.com

American Leak Detection

The Original Leak Specialists

American Leak Detection's highly trained technicians use non-invasive equipment to accurately locate leaks to save time, money and avoid unnecessary property damage. We are the world leader in the accurate, non-destructive detection of all leaks including hidden water, sewer and plumbing leaks.

Founded in 1974 in Palm Springs, CA, we operate a network of experienced Original Leak Specialists on five continents. Service technicians have detected more than 6 million leaks, saving customers millions of dollars in costly repairs.

We continually explore new methods and technologies to eliminate invasive procedures and ultimately provide the greatest cost savings.

Pool and Spa

If your pool or spa is losing water, it could be caused by structural cracks, liner leaks or plumbing defects. If the water level drops by more than ¼" in 24 hours or the automatic fill constantly releases water, call the Original Leak Specialists. Visit AmericanLeakDetection.com for instructions to test your pool using the bucket test.

Drain and Sewer

Using video sewer cameras, we can inspect, locate and record exactly what is occurring in your drain, waste or sewer lines. Root intrusion, cracks or other damage can be documented for additional examination and record of proof.

Industrial - Municipal

In large facilities and water distribution systems, undetected leaks can impact operating expenses. We provide both standard and complex correlator leak detection services to determine the size and scope of the problem. See an immediate impact on your budget and amount of water loss.

Insurance

Time is a critical factor in the resolution of water leak claims. Hiring the right specialist assures a timely, accurate outcome. Leak detection without destruction eliminates unnecessary restoration expenses. Our source and origin reports identify the problem and help expedite the claim.

Property Management

We understand the needs and concerns of property managers. Leaks can cause thousands of dollars in damage and require skilled, professional attention. Preserve the value of your property. Detect the problem before it surfaces.

Underground Utility Location

It's important to know the location and route of underground utility lines before you dig. Our experts use advanced technology to eliminate serious problems by tracing and profiling piping, electric, cable and sewer lines.
