ABOUT OUR *MODUS OPERANDI*

CP PAINTING PROCESS

The CP painting process was based on a deep analysis of the work reality. We found out that we could improve the painting control and efficiency by means of developing a hybrid associating equipment and advanced technology to the traditional methodology.

ABOUT OUR *MODUS OPERANDI*

CP PAINTING PROCESS

Using the equipments we associate speed and scalability in various painting stages. We use many machines with American and German technology, like airless sprays, spackle and texture projectors, orbital sanding machines, among others.

From the traditional methodology, we bring the quality and the characteristic control that this process has. Therefore we can define and control the quality of the services in individual blocks.
