

We work with commercial properties, including shopping centers, auto dealerships, office parks, restaurants, gas stations and banks, as well as communities like HOA's condominiums, and apartments.

Commercial and Industrial LED Lighting

A practical and inexpensive way to bring all of the advantages of LED lighting to the roadway and parking lot areas of your commercial property.

Street lights and parking lot lights present many unique financial and operational challenges for construction firms and commercial developers. Not only do the luminaires need to complement the property, they require 24/7 maintenance services to ensure a continuous sense of safety and security.

Benefits of FPL's LT-1 Tariff

FPL can help to alleviate your street and area light challenges by applying our LT-1 tariff. We offer a variety of premium street and area lighting options using LED technology, providing whiter, brighter and more consistent light.

- » Typically no upfront capital is required
- » Material, installation, maintenance and energy costs are paid in monthly service fees
- » All lights are equipped with Smart Nodes that can auto generate light outage notifications

Benefits of LED Lighting

- Superior light distribution
- Less light wasted equals less light needed
- Better color rendition
- Colors, lines and objects are easier to distinguish; improves visibility and safety
- Reduced energy consumption
- Reduced carbon footprint and lower energy bills
- More dependable fixtures
- Fewer outages and lower maintenance costs
- Greater variety
- More choices to address diverse needs

FPL – Leaders in Light

- » Providing street light services for over 60 years
- » Own and maintain over 500,000 lights throughout our territory
- » Broad selection of lighting solutions specifically chosen to withstand coastal environment
