Affiliations

- Registered with RealPage, RMIS and Net Vendor
- Proud member of SEFFA, CAI and ICSC

Worth Avenue, Palm Beach

Who We Service

We proudly serve (but are not limited to):

- Home/Condo Owners Associations
- Apartment/Condo Management Companies
- Retail/Commercial/Industrial Properties
- Federal Agencies
- Local, County and State Governments
- Shopping Centers/Malls
- Schools and Universities
- Medical and Hospital Facilities/Assisted Living Centers
- Entertainment Centers/Sports Venues
- Banks/Financial Institutions
- Hotels and Motels
- Churches/Synagogues

One of our experienced project managers will meet with you to identify your specific needs and educate you as to your available cleaning options.

Also, included in that discussion will be the planning and scheduling of the project so that everything runs smoothly and on time. If your project requires night/week-end work, those requisites will be met.

Our exceptional service and workmanship begins with our first meeting and continues throughout the project until completed with 100% customer satisfaction.

Our goal is to develop a long-standing, mutually beneficial relationship.

All employees are background checked before employment and drug/alcohol tested on an on-going basis.

Vehicles and Equipment

Green Earth's trucks are the best equipped in the industry. Our state-of-the-art equipment is manufactured to our exacting standards. Few powerwashing companies have the quality, amount and size of our surface cleaners. They are all manufactured for specific uses.

Our 48, 60, and 72 inch surface cleaners are made so that a specific walkway/surface is cleaned in one pass (instead of several passes). This process does not leave distasteful "stripes" on the surface. Our 36, 30, 24 and 20 inch surface cleaners are manufactured for the same specific purpose. Our unique gutter swale cleaners can clean (with superior results) miles of swales/curbing per day.

Our high pressure hoses can reach more than 1,000 feet from our trucks so that no area is inaccessible to clean.

Hot water (200+ degrees) is our "secret" to achieving quality results. Hot water will remove dirt and grime and will kill mold/mildew/algae at its root. Cold water alone only washes away the surface material leaving the root of the spores. The spores immediately start to regrow after cold water cleaning.

Green Earth's typical process includes...

- Applying a cleaning solvent as a pre-wash to loosen the surface dirt/grime/spores
- Hot water powerwash
- Rinse surfaces with clean water
- Apply an algaecide to prevent the mold/mildew/algae from immediately growing back

Each truck is equipped with the following...

- 2- custom 24 HP hot water pumps, each producing 200+ degree hot water, 9 gallons per minute @ 3,500 PSI
- 1- 24 HP cold water powerwasher unit producing 8 gallons per minute at 3,500 PSI
- 72, 60, 48, 30, 24 and 20 inch wide surface cleaners which disperse the high pressure so that there is no damage to the surface that is being cleaned
- 3- operator work stations with up to 1,000 feet of high pressure hose
- 1- 1,035 gallon water tank fitted out to fill from water hydrants in 10-15 minutes
- 1- 400 gallon tank for cleaning solution
- 1- 30 gallon tank of de-greasing agent
- DOT flashing lights and high intensity flood lights

Who & What Is Green Earth Powerwashing

Green Earth Powerwashing's philosophy is to provide great customer service along with integrity, dependability and honesty.

We offer our best advice to address your problem with knowledge gained by many years of experience and our expertise in the business.

Green Earth Powerwashing is owned by a college-educated family with over 25 years of experience in the power/pressure washing industry.

Green Earth is set apart from other powerwashing companies for a variety of reasons:

- We understand the problem and will develop a reasonable and cost-effective remedy to cure it.
- We are more than adequately insured with both liability and workers' compensation policies.
- We use innovative state-of-the-art equipment and technology which offers quality results.
- Our equipment is fuel-efficient while producing abundant hot water (200+ degrees) which cleans almost any surface.
- We supply our own water.
- We work well with property/maintenance/facility managers and owners.
- We have gained "preferred vendor status" with many local and national management companies and H.O.A.s. Many have also secured multi-year service contracts with us.
- We will work with you to develop a strategic plan that will preserve/protect your investment.

Our priority is to provide outstanding customer service and maintain our sterling reputation offering the highest quality workmanship in the business today. Green Earth work crews are dressed in company uniforms and supervised by experienced and knowledgeable foremen who are focused on attention to detail and quality results. Safety is our first priority. All employees attend regular monthly safety meetings. OSHA guidelines are strictly adhered to and state-of-the-art, well maintained safety equipment is used.

Green Earth machines and equipment are manufactured to our exacting specifications. Our equipment offers the best results at the fastest speed. Our equipment leaves no eyesore "stripes" on the clean surfaces. We offer 24/7 availability for emergency and special accommodations.
