

# INDUSTRY LEADER IN POLYURETHANE FOAMS

Low pressure one-  
component polyurethane  
foam(s) (OCF)

Low pressure  
spray polyurethane  
foam(s) (SPF)

Low pressure pour-in-  
place polyurethane  
foam(s) (PIP)

Accessories and  
dispensing  
technologies

## BUILDING MATERIALS

Handi-Foam® low pressure one- and two-component polyurethane foam sealants, adhesives, pour-in-place and spray foams offer performance, enhanced results and experience for contractors and contribute to a better environment. Our offering of standard products and exclusive technologies provides energy savings, enhanced structural stability and custom partnership opportunities. Applications include:

- Air sealing
- Residential wall insulation
- Foundation insulation
- HVAC duct sealing
- Drywall adhesives
- Fireblocking
- Sealing around windows and doors
- Sealing electrical and plumbing penetrations

## SPECIALTY

Through our unique chemistries, innovative application technologies, and advanced R&D capabilities, we are able to design and manufacture products for any OEM, industry or application, including:

As the adhesives and sealants industry leader, ICP Adhesives & Sealants is built on the foundation of commitment to developing innovative products, exclusive technologies, and dependable services that improve the overall product performance, safety and experience for our customers. Since 1975 we have provided accessible, personalized support and branded solutions to our distributors and partners. Our relationships are cultivated with trust, respect and doing right by our customers.

## INNOVATIVE, PROPRIETARY ICP TECHNOLOGIES

## ROOFING

Polyset® adhesives provide low pressure solutions for steep-slope roof tile adhesion and low-slope commercial roofing applications. Polyset products are available in the form of low pressure one- and two-component polyurethane foam adhesives in pressurized disposable and refillable packaging. All roofing adhesive products offer unique dispensing technology, strong adhesion properties along with ease in application and durability. For steep-slope applications, Polyset roof tile adhesives are approved for use in the most stringent high-wind regions of the world. For low-slope applications, Polyset is specifically designed to adhere to a variety of insulation boards, cover boards and single ply fleece back membranes to various substrates. Applications include:

- Clay and concrete roof tiles
- Insulation & cover board adhesion
- Single ply fleece back membrane adhesion
- Custom private label applications
- Mine ventilation sealants
- Commercial and recreational vehicle insulation and sound deadening
- Marine flotation sealants
- OEM / In-Line manufacturing applications
- Concrete lifting
- Pest control
- Brand partnerships

## ABOUT ICP GROUP

Innovative Chemical Products (the ICP Group) is a specialty platform company in the coatings, adhesives, sealants and elastomers (CASE) markets. We focus on accelerating organic growth through building world class organizations and technologies, and then augmenting it with strategic acquisitions.

Innovative Chemical Products plans to rapidly grow through acquisitions in both new and existing end markets, product lines and technologies, as well as maintaining a strong organic focus. This is accomplished by building outstanding management teams and strong brands that contribute to our platform growth.

Above all, innovation is the foundation of our company. Our products and brands set the standard in their markets, and our continued investment in advancing technologies, quality, and delivery brings unparalleled value to our customers in each and every market we serve.
