

# Why Switch To LED?

We have changed hundreds of facilities and we average about 70% energy savings and a 2.5 year payback time. You cannot go wrong switching to LEDs, below are some of the crazy benefits you will experience.

**Energy Savings:** Reduce your energy bill by 70% instantly. A 300W led fixture replaces a 1000W traditional fixture with zero loss in illumination.

**Maintenance Savings:** LEDs have up to 100,000 hour lifetime allowing you to completely cut out your budget for maintenance.

**Return-On-Investment:** Our usual led retrofit projects take 2-3 years to payback the entire cost of the project with energy and maintenance savings.

**Lighting Quality:** LEDs have no flicker, buzz, hum, or warm-up periods. They are unaffected by cold temperatures, have excellent color rendering, contain zero mercury or hazardous substances, and illuminate 3-4 times more than traditional lighting.

**Increase Property Value:** Getting LEDs installed into your facility will appreciate the value of your property by increasing visibility, safety, and appearance.

Contact us and see how we can improve your facility.
