At Pipe Restoration Solutions, our business philosophy is simple: We want to First, listen to your need. Second, identify the best solution and Third, deliver the highest quality end result all while giving you a great customer experience.

VIDEO PIPE INSPECTION

We partner with you by taking all the guesswork out of your problems and provide an “in living color” video inspection of your plumbing or piping system. Our waterproof cameras allow for a clear visual inspection of sewer lines and pipes that are under ground, in walls, encased in concrete, under water or anywhere else.

PIPE CLEANING

A clogged sewer or storm drain pipe can be very costly in damages. We believe in “restorative” cleaning and utilize the latest technologies available not only to clear the blockage, but to also completely remove it from your plumbing system and opening up your pipe to its original diameter.

TRENCHLESS PIPE REPAIR

In a nutshell, Trenchless Pipe Repair means we can restore your failing sewer pipes and water lines efficiently and effectively, without tearing up your property and ruining your yard. A variety of advanced techniques are at our disposal to ensure that your property stays intact while we repair your sewer pipes and water lines.

BRUSH COATING

The brush coating pipe repair is a first-rate compliment to our trenchless technology in the repair of your piping infrastructure. The resin combined with the brush coating system makes it an extremely effective method providing damp-proof, corrosion resistant, wear resistant, and a non-corrosive lining to your drain and sewer pipes.

SOVENT CLEANING

Our cyclonic cleaning system is another non-evasive cleaning method developed to clean the multi-story sovent systems installed in buildings. The sovent systems are a single pipe drainage systems specifically engineered to maximize space and save money. Our proprietary cleaning method eliminates the need for multiple access points while reducing down time that you will find with your typical cleaning methods.

TURN KEY PROJECTS

At Pipe Restoration Solutions, We are set apart in our industry due to the fact we are dually licensed as both a “General Contractor” and a “Master Plumbing Contractor”. What this means for you is that we can take the entire project on and handle all the details from the beginning to the end. We want to make life easy for you and be your one point of contact. From the initial educational and discovery process, to engineering and permitting, to actual construction and inspection, and finally to close out and warranty, we can handle it all.
