

## Storm Panel Shutters

- **Storm Protection**
- **Lowest Cost**
- **Light Weight Aluminum or Polycarbonate**
- **Easy to Put up or Take down**

Panel Shutters are used for storm protection when you want affordability or when other products don't cover the opening as well. We have Aluminum panels or Clear Polycarbonate. Depending on where you live is the deciding factor on which you can use.

They can be used on standard windows and doors, bay windows or specialty shaped architectural windows. They can also be installed horizontally in certain applications.

Panel Shutters are easy to put up and take down. They can be numbered and stored efficiently. In the high velocity hurricane zones you can use the Aluminum together with the Clear to help let light in during a storm.

## Bahama & Colonial Shutters

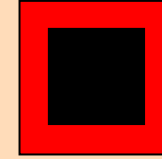

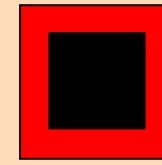

- **Storm Protection**
- **Aluminum Construction**
- **Light Control**
- **Privacy**
- **Adds Architectural Charm**

Bahama Shutters are permanently hinged at the top of the shutter and supported by adjustable poles at the bottom. The Caribbean style allows cool breezes and soft diffused light to pass through. They allow privacy and provide protection from the effects of the sun on floors, furniture and draperies.

Colonial Shutters are permanently hinged at each side of the opening and fold to close in the center. They add to the architectural element of your home and are made from extruded aluminum which makes them extremely reliable and weatherproof.

These shutters are easy to maintain and easy to close. If you are looking for hurricane protection and want to add beautiful architectural accents to your home or office building then these are your best choice.

## ***Accordion Hurricane Shutters***

- ***Storm Protection***
- ***Added Security***
- ***Light Control***
- ***Privacy***

Accordion Shutters move from side to side and are the best in affordability and convenience of use for storm protection. Whether you are using them on your house, condo, or place of business, we have selected from the best performing products that will fit most applications.

Some of these would be: standard windows and doors, curved windows, bay windows, enclosing your balcony or security for store front windows and doors.

Accordion Shutters are easy to operate, attractive and can be equipped with Porthole Windows to permit light in during a storm. They can stack away from the opening to allow a complete and unobstructed view. They can also be equipped with a variety of keyed locking devices when security is an issue. When you combine them with our maintenance service they can last a very long time.

## ***Roll-Up Hurricane Shutters***

- ***Storm Protection***
- ***Added Security***
- ***Energy Savings***
- ***Light Control***
- ***Noise Reduction***
- ***Privacy***

Roll-Down / Roll-Up Shutters are the most convenient shutter to use in storm protection for any home or business. Our product is Florida Building Code approved for Non-High Velocity and High Velocity Hurricane Zones (Dade and Broward counties). This high performing shutter fits many applications and retracts out of the way with the push of a button and/or a manual crank.

Used for some of the following applications: standard windows and doors, enclosing patios and balconies, security for store front windows and doors.

Roll-Up Shutters can blend in with your buildings architecture and can become invisible. When building a new home, they can be incorporated into the structure so they will only be visible when lowered.

## ***Impact Windows and Doors***

- ***Storm Protection***
- ***Added Security***
- ***Energy Savings***
- ***Noise Reduction***
- ***Stainless Steel***
- ***Light Control Available***
- ***Possible Insurance Discounts***

Impact windows and doors offer the storm protection you are looking for while providing many other benefits. They give the added security from burglaries, reduce the amount of outside noise and can filter up to 99% of harmful UV light. When manufactured with insulating glass they can provide exceptional energy savings.

They come in many configurations: single hung, double hung, horizontal roller, casement, fixed / architectural and sliding doors.

These windows and doors can sometimes create discounts on your insurance policies! Many times we install these beautiful windows together with hurricane shutters for double the protection.
