# Don't Destroy Your Floors or Your Walls. There's a Better Way!

Save YOUR Time and YOUR Money with an SPT Trenchless Pipe Restoration System.

## How We Do It:

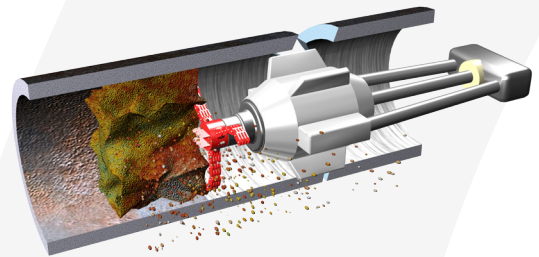

### Step 1

First, an SPT sewer camera reveals a blocked, breached and/or root intruded pipe.

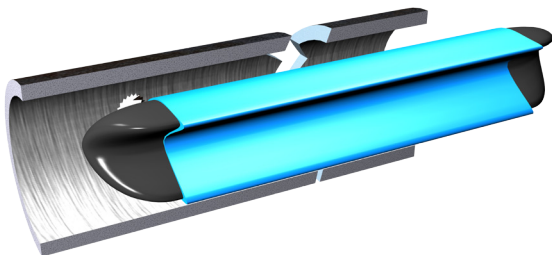

### Step 2

Then, a cutting tool cleans the pipe.

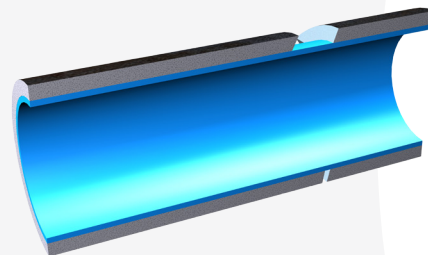

### Step 3

Next, a liner is pulled into place and the bladder inflated.

### Step 4

Finally, after curing the bladder is removed leaving behind YOUR NEW structural "pipe within a pipe".

Establish a relationship with SPT and see what's really going on in your system.
