WHAT OUR CLIENTS ARE SAYING

“

We had a sewer water intrusion that involved 7 units in our condominium. WRG employees did a remarkable job. They communicated via email, text, and phone and answered all our questions and concerns on time.

Nelly,
Property Manager

“

I've had the pleasure to work with the team at The Water Restoration Group for over 9 years and would highly recommend them above all other restoration companies. They have proven time and again to be extremely responsive, proactive, responsible, and honest.

Lorena,
Property Manager

“

When calamity strikes, our Disaster Response Team will be at your door in less than 45 minutes.

Abby,
Office Manager.

Identify Allergens
Remediate Spores, Mold, and Fungus
Antimicrobial Clean Up

Undisturbed Asbestos-containing materials rarely pose any health risks. However, a unit or building that has a sudden water loss or a renovation project that impacts Asbestos material can significantly increase the exposure of releasing fibers into the air. WRG's trained professionals will safely and securely inspect and remove Asbestos-containing materials.

Asbestos-containing materials are found in building construction products sold in stores today. It is not safe to assume that because your building is new, it does not contain Asbestos.

Robert, WRG VP of Environmental/Asbestos Contractor with over 30 years of experience in Asbestos related issues.

When the fire is out, water damage, soot, and odor damage remains. Do not attempt to handle it on your own. WRG's professional Fire Damage Restoration Team will determine a unique course of action. We use state-of-the-art cleaning technology and correct cleaning solutions to restore your property back to normal.
